

REGISTERED INDEX-LINKED ANNUITIES

Jackson Market Link Pro[®] Advisory

PRODUCT OVERVIEW

What is a registered index-linked annuity (RILA)?

A RILA is a long-term, tax-deferred vehicle designed for retirement. It is subject to investment risk, its value will fluctuate, and loss of principal is possible. A RILA, which is an insurance contract, allows you to choose how you want to prioritize growth opportunities while managing the amount of loss you may assume. Earnings are taxable as ordinary income when distributed. Individuals may be subject to a 10% additional tax for withdrawals before age 59½ unless an exception to the tax is met.

Product Features

Contract Information

Withdrawal Charges*	None
Maximum Issue Age	85
Latest Income Date¹	95
Minimum Single Premium	\$25,000. Subsequent premiums not allowed.
Market Value Adjustment (MVA)²	The Company applies an MVA to certain amounts withdrawn or annuitized during the first six contract years. The MVA may result in an increase or decrease to amounts removed from your contract.
Free Withdrawals^{3,4}	During the first six contract years, you may withdraw up to 10% of contract value annually, free of MVA. The Interim Value calculation may still apply.
Required Minimum Distribution (RMD)^{4,5}	Jackson Market Link Pro Advisory is required-minimum-distribution friendly, so qualified contracts may not be subject to market value adjustment. The Interim Value Calculation may still apply.

Growth & Protection Options

(See your financial professional for options and availability)

Index Account Option Term(s)⁶ 1-year or 6-year terms.	Index(es) Premiums may be allocated to index options, including the S&P 500 [®] , Russell 2000, MSCI EAFE, MSCI KLD 400 Social, and MSCI Emerging Markets indexes.	Rate(s) Rates are guaranteed [†] for each Index Account Option Term. Please see your financial professional for current rates.
Crediting Method(s)[‡] Multiple crediting methods offer ways to calculate and lock in potential index-linked returns. You may select any one, or a combination, of these methods and have flexibility to change selections and allocations penalty-free at the end of each Index Account Option Term.	Buffer(s) and Floor(s)[‡] A buffer protects from loss up to a stated percentage—10% or 20%. ⁷ A floor protects from loss after a stated percentage— -10% or -20%. ⁸ The level of protection available will depend on the crediting method selected.	Fixed Account Option⁹ Premium allocated to the Fixed Account Option earns interest at an annually renewable rate never less than the Fixed Account Minimum Interest Rate (FAMIR) of 1% to 3%. The FAMIR may be redetermined annually and will be effective on the contract anniversary date.

Additional Benefit

Death Benefit¹⁰	For issue ages 0-75, the standard death benefit is the greater of the contract value or premium adjusted for withdrawals. For issue ages 76-85, the standard death benefit is the contract value.
-----------------------------------	---

* All or any portion of the contract may be withdrawn at any time prior to the Income Date free of Withdrawal Charges. The Interim Value calculation may still apply.

[†] Guarantees are backed by the claims-paying ability of Jackson National Life Insurance Company.

[‡] Not all crediting methods and/or protection options are available with all Index Account Option Terms.

Jackson[®] is the marketing name for Jackson Financial Inc. and Jackson National Life Insurance Company[®].

This material is authorized for use only when preceded or accompanied by the current contract prospectus. Before investing, investors should carefully consider the investment objectives, risks, and charges of the registered index-linked annuity. This and other important information is contained in the current contract prospectus at Jackson.com/ProspectusJMLPA. Please read the prospectus carefully before investing or sending money.

Jackson, its distributors, and their respective representatives do not provide tax, accounting, or legal advice. Any tax statements contained herein were not intended or written to be used and cannot be used for the purpose of avoiding U.S. federal, state, or local tax penalties. Tax laws are complicated and subject to change. Tax results may depend on each taxpayer's individual set of facts and circumstances. You should rely on your own independent advisors as to any tax, accounting, or legal statements made herein.

Guarantees are backed by the claims-paying ability of Jackson National Life Insurance Company. They are not backed by the broker/dealer from which this annuity contract is purchased, by the insurance agency from which this annuity contract is purchased or any affiliates of those entities, and none makes any representations or guarantees regarding the claims-paying ability of Jackson National Life Insurance Company.

- ¹ Qualified plans may require an earlier distribution. The Latest Income Date under this contract is the owner's age 95, which is the required age to annuitize or take a lump sum.
- ² The Company applies a market value adjustment (MVA) to certain amounts withdrawn during the first six contract years (the MVA period). The MVA may result in an increase or decrease to amounts withdrawn, increasing or decreasing the amount paid. Please see the prospectus for details regarding the calculation of the MVA. Taxes may apply to any withdrawal you make.
- ³ Each contract year, up to 10% of the contract value determined at the beginning of the contract year may be taken free of MVA. Free withdrawals not taken in a contract year are not available in future contract years.
- ⁴ All withdrawals, including automatic withdrawals, required minimum distributions (RMDs), and free withdrawals, apply to the total amount withdrawn in a contract year and are subject to the Interim Value calculation. The RMD withdrawal must be for this contract only and you must specify that the withdrawal is an RMD. Partial withdrawals during the MVA period reduce the contract value on a dollar-for-dollar basis and may be subject to applicable MVA. For more information on the Interim Value calculation, please see the contract prospectus. Taxes may apply to any withdrawal you make.
- ⁵ The RMD for this contract may be taken from a qualified Jackson Market Link Pro Advisory contract free of MVA, even if the amount exceeds the 10% free withdrawal provision. The RMD withdrawal value is based on the contract value. If a withdrawal taken before the sixth contract anniversary exceeds the greater of the RMD requirement or the free withdrawal benefit, the excess amount withdrawn will be subject to MVA.
- ⁶ The availability of each Index Account Option Term varies by firm and is subject to change. Jackson reserves the right to suspend the availability of an Index Account Option Term at any time.

- ⁷ A buffer will protect from loss up to the stated percentage. During the Index Account Option Term, if the index declines more than the stated buffer, you will incur a loss.
- ⁸ A floor will protect from loss after a stated percentage. During the Index Account Option Term, you could incur a loss up to the stated floor percentage and are protected from further loss beyond the floor.
- ⁹ The Fixed Account Value will never be less than the Fixed Account Minimum Value. The Fixed Account Minimum Value is equal to 87.5% of premium allocated to the Fixed Account reduced by withdrawals, taxes, and a \$50 annual deduction, accumulated at the Fixed Account Minimum Interest Rate.
- ¹⁰ If the oldest owner's age when the contract is issued is between 0 and 75, the death benefit is equal to the greater of the current contract value or premiums paid into the contract adjusted for any withdrawals incurred since the issuance of the contract. If the oldest owner's age is between 76 and 85 when the contract is issued, the death benefit is equal to the current contract value.
