Before investing, investors should carefully consider the investment objectives, risks, charges, and expenses of the variable products and their underlying investment options. The current contract prospectus and underlying fund prospectuses provide this and other important information. Please contact your financial professional or the company to obtain the prospectuses. Please read the prospectuses carefully before investing or sending money.

These portfolios are only available as sub-accounts within variable products (variable annuities and variable universal life insurance). Variable annuities are intended to be long-term, tax-deferred investments designed for retirement. Earnings are taxable as ordinary income when distributed. Individuals may be subject to a 10% additional tax for withdrawals taken before age 59½, unless an exception to the tax is met. Variable universal life insurance policies are subject to substantial fees and charges. The value of these products will fluctuate, are subject to market risk, and loss of principal is possible.
